

Switching Instructions

The red Auto Openers v2 remote can switch between three different modes of operation, being the Automatic Technology Australia TrioCode 128, or the B7d Trian Tran+ enhanced encryptions.

Once you have swapped over the remote to your required mode of operation, please follow the steps to program a remote to the opener as you normally would.

Automatic Technology PTX5, PTX6

1. Press and hold Buttons 3 and 4 until the LED turns solid.
2. Release Button 4, do not let go of button Button 3.
3. Press Button 1 once. The LED will flash once.
4. Release Button 3. The remote is now set to Automatic Technology TrioCode 128.
5. Following the instructions for the original remote, program the remote to the motor

B&D TB5, TB6, TB7

1. Press and hold Buttons 3 and 4 until the LED turns solid.
2. Release Button 4, do not let go of button Button 3..
3. Press Button 2 twice. The LED will flash twice.
4. Release Button 3. The remote is now set to B&D TriTran.
5. Following the instructions for the original remote, program the remote to the motor
